Working Prototype Known Problems Report

Product Name: timetab

Team Name: makronii

Updated: 11/29/2021

- Unable to support multiple people with the same name as they all get mapped to the same database entry
  - Possible fix is to having email authentication and use emails as possible IDs
- Date picker has no way to select dates
- Able to create events with empty names and have start hour before end hour
  - Causes event page to be mostly blank
