Sprint #1 Report

Created - Oct 19, 2021

Rev. 2 - Oct 21, 2021

Product Name: timetab

Team Name: makronii

Actions to Stop Doing:
- Missing/delaying our standups due to forgetfulness/lack of communication

Actions to Start Doing:
- Talk more about our progress in the shared discord
- Find more time to work collaboratively on tasks
- Break down larger user stories into smaller stories

Actions to Keep Doing:
- Use discord for real time communication

Work Completed/Not Completed:

1. As an event planner, I would like to find out when people are free so that I can schedule an event. (21 sp)
   1. Complete preliminary UI/UX design of website (6 hours) **completed**
   2. Implement preliminary web interface shell (3 hours)
   3. Implement functional user input (4 hours)
   4. Set up Firebase app (2 hours) **completed**
   5. Connect website to Firebase (2 hours) **completed**

Work Completion Rate:

We had a target of completing 12 hours total between all members, but we were only able to achieve 8 hours total. We believe this largely had to do with getting used to the scrum methodology as well as getting settled into our classes. We also had a large number of spikes due to our unfamiliarity with the technologies and ended up severely underestimating the amount of work we needed to complete.
